LUXOL CLEAR VARNISH

Luxol Clear Varnish offers an easy to apply coating for your interior furniture, doors, window frames, photoframes, tables etc.

- Very easy to apply
- Ready to use product

IMPERIA EPOXY BLOCK PRIMER

It is a high performance, 2-component clear system, designed for natural wood, veneers, MDFs, ply & particle boards. It is a 2-pack product applied on raw wood after sanding, prior to application of PU sealer to arrest oil / resin / tannin leeching from solid woods & glue leeching from veneers / MDF & particle boards.

- Exterior & Interior application
- Superior stain resistant properties
- Retains the natural wood colour by arresting the undesirable leeching of wood resins / tannins / glues etc, present deep inside the wood grains
- Provides excellent bridging adhesion between the wood & the subsequent filler / sealer coats
- No added Lead, Mercury, Chromium or other heavy metals
- An excellent economical & long-lasting glossy substitute for conventional French polish / gala polish / lak daana polishing system

WOODKEEPER WOOD STAINER

It is used to offer a high-class, exquisite look of teak, walnut, dark walnut, oak, mahogany, ebony black, red brown etc, on ordinary woods like mango, sesame etc.

- No added Lead, Mercury, Chromium or other heavy metals
- Available in 8 clean, high-chroma, rich hue and high colour strength shades
- Packed in zero-loss aluminium bottles with inner and outer seal
- Applied with soaked cloth on raw wood for grain highlighting fashions and after 1st coat of sealer with proper sanding for colour homogenized shades
- The extra versions are of extremely high strength and can be mixed with Imperia Clear Sealer and applied by spray for interior applications only

WOODKEEPER FILL-O-DENT

It is a high-performance water-based dent filler cum wood-filler which is used to mend imperfections like holes, dents and scratches.

- A water-based dent filler with excellent filling properties
- Good adhesion on various wood types and on products like veneer, MDF, ply and particle boards
- Used for both interior and exterior application
- No added Lead, Mercury, Chromium or other heavy metals
- Low VOC products. Offered in white, teak, walnut and dark walnut shades
- Can be tinted with CB colourants and also with Berger Wood Stains to fine tune colour to match the colour of wood, which is done for filler masking

WOODKEEPER EZEE POLISH

Wookeeper Ezee Polish is a one component solvent based interior wood-coating product that offers a glossy look to your interior wood-work. Application process of this product is really very easy as it can be applied by brush & cloth & with minimum of fuss one can get a furniture coated very easily.

- High Gloss
- Low smell
- High Transparency with no loss in clarity
- Easy to apply with hardly any drag felt

MIKRO CONKRETE

Home Shield Micro-Concrete is a high precision, non-shrink packaged dry repair concrete factory designed with select cement, aggregate and other chemicals to produce a pourable, but non-shrink cementitious concrete at the site condition when mixed with recommended quantity of water.

- Easy to pour in restricted locations
- Rapid strength development
- Ready to use for Repair of damaged concrete structures (column, beams, slabs etc.)

REPAIRO

This is a one component, non-sag, cementitious, multi-purpose patching and repairing mortar.

- Suitable for overhead applications
- Excellent adhesion and compatible with typical concretes

EPIBOND

Home Shield Epibond is a two-component, solvent free epoxy coating comprising epoxy resin and hardener. When the product is applied to old, cured concrete surfaces, Home Shield Epibond provides a permanent bond for new, freshly mixed concrete, mortar.

- Resultant bond strength is greater than the tensile strength of concrete
- High adhesive property to almost all construction materials
- Easy to mix, solvent free, application with hard brush

LEAK STOP

Home Shield Leak Stop is a ready-to-use blend of dry powders which requires the addition of clean water to produce highly consistent rapid setting cementitious, easy-to-apply mortar.

- Home Shield Leak Stop is particularly effective for stopping the flow of running water and stop leaks in concrete and masonry surface
- Easy-to-use. Requires addition of clean water only at site
- Excellent bond to substrate

	CRACK FILL (PASTE)	ADVANCE LATEX PLUS	SEAL-O-CRETE
COVERAGE / LT / 2 COATS	25 - 30 running meter/kg	75 - 85 sq.ft. / kg for 2 coats with proportion mix 1:4:7	0.360 kg / mt ² (2 coat slurry coating)
WATER REPELLENCE	NA	Ability of mortar	Excellent
UNIQUE PROPERTIES	Can be tinted in CB machine	Prevents seepage and dampness	Protects from water, Salt penetration and Carbonation
	NA	NA	Non - corrosive on steel & iron
	NA	NA	Good abrasion resistance

*Under ideal test conditions with proper surface preparation

CRACK FILL (PASTE)

Home Shield Crack Fill Paste is a ready-to-use flexible putty for filling cracks in plastered surfaces. It can be used for both interior and exterior surfaces.

- Easily applicable by putty knives like conventional putties
- Can be tinted with water-based stainers
- Overcoatable with any paint after 24 hrs

ADVANCE LATEX PLUS

Home Shield Advanced Latex Plus is Styrene-Butadiene latex-based liquid for high-performance waterproofing multipurpose repair work.

- Strong bonding with concrete brick stone etc.
- Easy to use non-toxic and slightly plasticizing mortar
- Improves surface hardening and provides durability

SEAL-O-CRETE

Home Shield Seal-O-Crete is a polymer for making cement-based, polymer modified, waterproof slurry coating.

- Acrylic waterproof coating
- It is applied to concrete and masonry surfaces to prevent water infiltration and dampness
- It has the flexibility to accommodate thermal expansion of concrete

	CEMENTMIX PLUS	POWER PLASTICIZER	BLOCK BOND	ALPLAST SUPER
DURABILITY	Excellent	Excellent	Excellent	Excellent
COVERAGE / LT / 2 COATS	Depends on substrate	200 ml per 50 Kg Cement (for M20 Grade of Concrete)	Depend on substrate	0.16 - 0.23 Kg / Sq.ft. / mm
FINISH	NA	NA	NA	NA
UNIQUE PROPERTIES	It makes the concrete more unified hence preventing any bleeding or segregation	Applicable for higher grade of concrete (Can be used up to G+7 buildings)	Thin bed adhesive	Reduced water absorption and enhanced durability
	It enhances the impermeability of water into any reinforced structure	Eliminates crack development in concrete thereby reducing shrinkage	Applicable on AAC block, concrete block and fly ash brick	Consistent quality made using a mixture of well graded sand and additives
	It eliminates the development of cracks in the plaster or concrete by reducing any shrinkage	Compatible with all types of cement inclusive of PPC, PSC & SRC	NA	NA

*Under ideal test conditions with proper surface preparation

CEMENTMIX PLUS

Cementmix Plus is a specially formulated additive composed of cement compatible, corrosion inhibitors, surface additives, polymers and other agents. It improves the integral waterproofing properties of cement concrete and plasters after curing. It is used as an additive for cement concrete / plaster / mortars. Because of its plasticizing properties which makes concrete denser and prevent segregation.

POWER PLASTICIZER

Highly effective specially formulated water reducing polymer modified multifunction superplasticizer for concrete with controlled extension of workability and setting time.

- Hi Performance integral liquid waterproofing for new concrete
- PCE Technology: Better result with lower dosage than conventional Integral Waterproofing
- Substantial improvement in workability without increased water

BLOCK BOND

Home Shield Block Bond is a ready-made polymer modified water resistant grey cement-based adhesive.

- Designed for laying aerated lightweight concrete, blocks
- It can be used for smoothing over the block surface in layers

ALPLAST SUPER

This is a readymix cement plaster with high quality polymer additives, well graded sand and fillers for manual plastering applications.

- Needs less curing and binds better to substrate
- Ideal for well-prepared walls with maximum thickness of plastering up to 15 mm
- Very less waste due to least rebound

	TARFELT DPC	HDPE MEMBRANE	SBS MEMBRANE
DURABILITY	Excellent	Excellent	Excellent
COVERAGE / LT / 2 COATS	0.70 kg / m ² / Coat	NA	NA
ANTI-FUNGAL	Excellent	NA	NA
WATER REPELLENCE	NA	Excellent	Excellent
UNIQUE PROPERTIES	Excellent Waterproofing Characteristics	Resistance to root penetration, suitable for green roofs	Can elongate up to 300%
	Can be applied on moist surface also	Exceptional resistance to heat, UV, Ozone, bacteria, chemical, acid corrosion	Cold applied, does not require heat
	Excellent vapour barrier	Continuous serviceability from - 30°C to 100°C	Effective water and vapour barrier

*Under ideal test conditions with proper surface preparation

TARFELT DPC

Home Shield TarFelt DPC is water-based, cold applied, single component, elastomeric in-situ seamless monolithic coating.

- Ready-to-use, acrylic modified bituminous liquid membrane
- Can elongate up to 200%
- Crack bridging ability up to 0.8 mm

HDPE MEMBRANE

Home Shield Proshield HDPE membrane is high performance, flexible High-Density Polyethylene (HDPE) sheet designed for waterproofing basements and podiums of new buildings.

- The membrane is designed for adhesion to RCC for easy application below rafts and reinforcements
- Available in two variants: Plain with PSA and Sand-coated (1.2 mm and 1.5 mm)
- The sheet remains flexible over years, maintaining its integrity and continuing to provide protection from water seepage from ground below

SBS MEMBRANE

High Performance SBS Modified Self-Adhesive Membrane.

- Highly recommended for waterproofing / damp-proofing of vertical foundation / walls
- Strong resistance to chemicals like chlorides, sulphates, alkalis, dilute acids, ozone and atmospheric pollutants

	TILE BOND HI-FLEX	TILE BOND ANTI-SLIP	TILE ADHESIVE ADVANCE	TILE ADHESIVE
DURABILITY	Excellent	Excellent	Very Good	Excellent
COVERAGE / LT / 2 COATS	74 Sq.ft. per 25 kg bag [3 mm thickness]	74 sq.ft. per 25 kg bag [3 mm thickness]	50 - 55 sq.ft. / 20Kg bag at 3 mm thickness	50 - 55 sq. ft / 30kg Bag
WATER REPELLENCE	Moderate	Moderate	Moderate	NA
UNIQUE PROPERTIES	No vertical slip	No vertical slip	Self-curing with superior water retention	Non-shrinking self curing
	Extended open time	Extended open time	Superior bond strength with the substrate	NA
	Suitable for use where high performance is required	Suitable for use where high performance is required	Offers partial impermeability of water into concrete	NA

*Under ideal test conditions with proper surface preparation

TILE ADHESIVE PLUS

Home Shield Tile Adhesive Plus is a ready mixed, high end polymer modified cement-based thin bed tile adhesive powder, which can be used for multi-purpose application.

- Provides outstanding bonding of tiles with cementitious surfaces such as plaster and concrete
- Suitable for wall application and tile-on-tile application
- Can be applied in swimming pools as well as internal wet areas

TILE ADHESIVE

Home Shield Tile Adhesive is a ready to use polymer modified cement-based grey coloured thin bed tile adhesive, suitable especially for horizontal floor tiling on a cementitious substrate and for wall tiling on plastered surfaces, by replacing usual sand-cement method.

- Better bonding than conventional cement based mortar
- Non-sagging
- Self curing

TILE BOND HI-FLEX

High performance, anti-slip, highly flexible, cementitious tile adhesive with extended open time for fixing large format tiles and stone on interior and exterior floor and wall.

- Cement base (C) Improved (2) slip resistant (T) with extended open time (E) and deformability (S1) classified as C2TES1
- Deformability / high flexibility
- Application up to 15 mm thickness

TILE BOND ANTI-SLIP

High performance, anti-slip, cementitious tile adhesive with extended open time for vitrified, ceramic, natural stone, marble glass mosaic.

- Cement base (C) Improved (2) slip resistant (T) with extended open time (E) classified as C2TE
- No curing required
- Application up to 10 mm thickness

	EPOXY TILE GROUT	CEMENTITIOUS TILE GROUT	WEATHERCOAT LONGLIFE PU TILE COAT	TILE CLEANER
DURABILITY	NA	NA	NA	NA
COVERAGE / LT / 2 COATS	Depends on size of tile	Depends on size of tile	90 - 100 sq.ft	Depends of substrate condition
ANTI-FUNGAL	NA	NA	Very Good	Excellent
DIRT REPELLENCE	NA	NA	NA	Excellent
WATER REPELLENCE	Brilliant water resistance; applicable for wet areas	Good water resistance	Good	NA
FINISH	NA	NA	High Gloss	NA
UNIQUE PROPERTIES	Can be used indoors and outdoors	Can be used indoors and outdoors	Superior Sheen enriched with PU	Can be used on various acid-resistant surfaces
	NA	NA		Does not attack substrates vigorously, while quickly removes the most stubborn mineral deposits
	NA	NA	Superior Film Strength	Economical, can be diluted, depending upon requirements

*Under ideal test conditions with proper surface preparation

EPOXY TILE GROUT

Home Shield Epoxy Tile Grout is a two-component epoxy resin based tintable joint filler specifically developed for use in application of ceramic tiles, vitrified tiles and stone tiles where shrinkage shall be avoided with durable waterproofing.

- Suitable for wide grouting up to 8 mm
- Can be used indoors and outdoors
- Excellent adhesion

CEMENTITIOUS TILE GROUT

Home Shield Tile Grout is a ready mixed flexible cement based powder. The product contains additives which improve water resistance and workability. It has been specially formulated to provide low shrinkage.

- For interior and exterior wall and floor tiling
- Excellent adhesion and non-sagging
- Suitable for all kinds of Joints in between tiles up to 8 mm in width

WEATHERCOAT LONGLIFE PU TILE COAT

Weathercoat Longlife PU Tile coat is a 100% acrylic high performance roof tile paint. It is enriched with PU for Hi Sheen finish & superior strength to the paint film protecting your roof tiles from rain, algae and fungus.

- Hi Sheen Finish
- Water Resistant
- High Adhesion
- Anti Algal & Anti-Fungal

TILE CLEANER

Home Shield Tile Cleaner is a fast acting acidic cleaner for all types of hard tile surfaces and grouts, in addition to its use for variety of other applications.

- Perfect agent for cleaning by 'acid etching' before application of Epoxy / PU etc.
- Works as an industrial bio-wash Kills spores, prevents algae / fungus formation

	LATEX SHIELD 2K	WALL SHIELD 2K	DAMPSTOP ADVANCED	DAMPSTOP DUO
APPEARANCE	White Liquid and Grey Powder	White Liquid and White Powder	White Powder	White Liquid
COVERAGE / LT / 2 COATS	12 sq. ft. / kg / 2 coat	12 sq. ft. / kg / 2 coat	45 - 55 sq. ft. / lit per coat	90-100 Sq. Ft. / lit / Coat
FLEXIBILITY	Bridge up to 1.2 mm	Bridge up to 1.2 mm	NA	NA
WATER REPELLENCE	NA	NA	Excellent	Good
UNIQUE PROPERTIES	Mix and apply easily	Provides lasting protection against carbonation & efflorescence	Ready to use and easy to apply (Pre-putty application)	Waterproofing Primer based on nano technology
	NA	NA	Excellent adhesion to the substrate	2 years' waterproofing warranty on interior surface
	NA	NA	Long lasting prevention from Dampness and Efflorescence	Resistance to alkali, damp and efflorescence

*Under ideal test conditions with proper surface preparation

LATEX SHIELD 2K

Home Shield Latex Shield 2K is a high-performance waterproof coating for water retaining structures. On curing it forms an excellent waterproof and protective elastomeric layer over the surface and thus prevents water infiltration.

- Remarkable resistance towards ingress of water
- Provides a flexible coating
- Non-corrosive to steel and iron

WALL SHIELD 2K

It is a two component acrylic polymer modified white cement-based waterproof slurry coating consisting of water insoluble crystalline micro structure which acts by deep penetration within the very small gaps of plaster.

- Remarkable resistance towards hydrostatic pressure up to 5 bar
- Provides lasting protection against carbonation and efflorescence
 - Excellent adhesion to concrete, artificial and natural stones

DAMPSTOP ADVANCED

An excellent interior waterproofing / dampproofing barrier system. Nano-silicone technology works to block the porosities of the substrate through partial penetration coupled with controlled film formation on the substrate surface.

- Nano additives in the emulsion acts as per blocker
- Waterproofing effect up to 4 bar negative water pressure
- Prevents the wall from salt leaching

DAMPSTOP DUO

Home Shield Dampstop Duo is a specially formulated premium quality acrylic primer which also acts as a damp-proofing barrier based on nano technology. It provides superior alkali, damp and efflorescence resistance properties both from from positive and negative side of wall.

- Long lasting warranty on Dampness and Efflorescence
- Waterproofing effect up-to 2 bar negative water pressure
 - Prevents the wall from salt leaching
 - Ready to use and easy to apply
 - Penetrative Nano additive which blocks porosities

	PU ROOFKOAT	KOOL & SEAL	ROOFGUARD	TANKSHIELD PW
DURABILITY	10 years	8 years	Excellent	Excellent
COVERAGE / LT / 2 COATS	9 sq.ft. / Kg / 3 coats	10 - 12 sq.ft. / ltr / 2 coats	25 - 30 sq.ft. / lt / 3 coats	1.7 - 2.1 Kg /m ² / 2 coats
ANTI-FUNGAL	Excellent	Very Good	Very Good	Excellent
DIRT REPELLENCE	Excellent	Very Good	Very Good	NA
WATER REPELLENCE	Excellent	Very Good	Very Good	Excellent
FINISH	White	White	White	NA
UNIQUE PROPERTIES	Cooling effect up to 10°C	Reflects infrared radiations	Outstanding whiteness provides Cooling Effect	Remarkable resistance towards ingress of water
	UV Resistant	Water vapour permeable	Used as a primer on dilution with water	Excellent adhesion to concrete, natural and artificial stones
	Water vapour permeable	NA	NA	Provides flexible coating

*Under ideal test conditions with proper surface preparation

PU ROOFKOAT

Home Shield PU RoofKoat is one component liquid waterproofing membrane. It is solvent-free and requires cold application process. On application, it is highly elastic and UV resistant. It is economical and eco-friendly. Complaint with the requirement as laid out in ASTM D 6083-97a.

- UV resistant, prevents yellowing and weathering
- Highly elastic and crack bridging
- Seamless waterproofing membrane

KOOL & SEAL

Home Shield Kool & Seal is a water-based, flexible, waterproof coating for roofs / terraces / parapets. It is formulated with 100% Acrylic Elastomeric Polymer with good crack-bridging property. The heat reflecting particles present in this product reflects visible and infrared radiation, thereby reducing heatbuild-up and keeping the surface cool.

- Visible radiation and IR reflection keeps the surface cool
 - Easy to clean and non-staining
 - Prevents algae and fungal growth

ROOF GUARD

Home Shield Roof Guard is a water-based coating comprising special quality acrylic polymer along with reinforcing polyester fibres which after curing forms a brilliant white coloured, durable, seamless membrane-like waterproofing coating over the applied surface that stops water penetration.

- Can be used as a primer on dilution with water
- Prevents cracking up to 0.7 mm
- Suitable for foot traffic on roof area

TANKSHIELD PW

Home Shield Tankshield PW is a two-component polymer modified cementitious waterproof slurry mortar consisting of a liquid polymer and a cement-based mix incorporating graded aggregates and additives.

- Safe to be used in Potable water tanks and swimming pools
 - Non-corrosive to steel and iron
- Easy to mix and can be applied by brush

	PROSHIELD - APP MEMBRANE	POLYUREA	PU ELASTOSEAL NON-UV 1K
DURABILITY	Excellent	Excellent	Excellent
COVERAGE / LT / 2 COATS	NA	1 kg / m ² for 1mm thickness	1 Kg / m ² (1 mm DFT)
ANTI-FUNGAL	Good	NA	Excellent
DIRT REPELLENCE	NA	NA	NA
WATER REPELLENCE	Very Good	Excellent	Excellent
FINISH	NA	NA	NA
UNIQUE PROPERTIES	High resistance to impact, puncture and substrate movement	Extremely fast application time	High Crack Bridging
	Resistance to ageing and weathering	Excellent adhesion to nearly all substrates concrete, steel, aluminium, wood, foam etc.	Resistant to Root Growth
	High tensile and tear resistance	Good abrasion resistance & impact resistance	Excellent adhesion to concrete

*Under ideal test conditions with proper surface preparation

PROSHIELD-APP MEMBRANE

Home Shield Proshield APP Membranes are age-resistant, high-performance prefabricated water proofing membranes constructed of distilled bitumen modified with Atactic Polypropylene polymers (APP).

- Easy-to-apply with a propane torch
- Absolute impermeability to water
- Pure Acrylic Emulsion
- Available in 3 variants: Polyester reinforced, Glassfibre reinforced and mineral top (2/3/4 mm)

POLYUREA

Home Shield Polyurea MP500 is a spray-applied, 100% solids, flexible, two-component, rapid curing hybrid Polyurea system, designed as a durable, seamless waterproofing and protective coating with long life span.

- The system offers a permanently flexible, seamless waterproofing solution for a wide range of substrates
- Rapid application and instant curing characteristics enable shorter shut down times than traditional waterproofing products
- Superior durability and smooth finish

PU Elastoseal Non-UV 1K

Home Shield PU Elastoseal Non-UV 1K is single component, high tensile, high solid, moisture cured, modified Polyurethane elastomeric liquid membrane for waterproofing.

- Conforms to ASTM C-836 and ASTM C-898
- Liquid membrane for waterproofing with an elongation of 700 % ± 50
- Resistant to most mild acids / alkalis

	LUXOL PU ENAMEL	LUXOL HIGH GLOSS ENAMEL	LUXOL SATIN	BUTTERFLY GP SYNTHETIC ENAMEL	ANTISOL ROOF PAINT
DURABILITY	3 Years	3 - 4 Years	3 Years	3 - 4 Years	3 Years

WATER REPELLENCE	No	No	Yes	No	Yes
FINISH	PU gloss	High Gloss	Soft Sheen	NA	Gloss
UNIQUE PROPERTIES	Higher Viscosity, Better Hiding, Int & Ext	Mirror Like gloss, tough film, can with stand extreme weather conditions	Tough film coating with silky soft sheen & long lasting finish Better coverage with long durability Better washability	Full Gloss Value for Money, economic interior Paint	High water resistance
					Good anti-corrosive property Good gloss

*Under ideal test conditions with proper surface preparation

ANTISOL ROOF PAINT

Antisol Roof Paint is a super grade paint specially for hilly areas and high rainfall zones. Formulated with high water alkyds and additives, it is mainly used on roof top corrugated GI sheets. It can be applied on metal structures like beams, angles, joints and on asbestos roofs. It can be used on MS grills, gates and on wooden surfaces.

LUXOL SATIN

Luxol Satin Enamel is a long lasting Tough & Durable solvent-based paint, which comes in soft sheen finish with excellent washable properties and has good Damp defense.

- Silky soft sheen
- Anti-Fungal/Anti-microbial
- Green Pro Certified

LUXOL PU ENAMEL

Premium quality PU Enamel with superior long lasting gloss and coverage.

- Excellent Gloss
- Anti-Fungal
- Extra Coverage

LUXOL HI-GLOSS ENAMEL

Luxol Hi-Gloss Enamel offers mirror like gloss suitable for Metal, Wood and Masonry surfaces.

- Mirror Like gloss
- Tough & Durable
- Superior coverage

BUTTERFLY GP SYNTHETIC ENAMEL

Butterfly GP Synthetic Enamel is a long lasting, glossy, solvent-based topcoat paint, which gives long lasting glossy finish. It gives smooth finish, better coverage and is suitable for wooden and mild steel metal surfaces.

- Full gloss
- Tough & Durable
- Value For Money

	LUXOL QD 1K EPOXY PRIMER	BP ANTI CORRASIVE 1K EPOXY PRIMER	BP ZINC YELLOW PRIMER	BUTTERFLY AC METAL PRIMER RED OXIDE	RED OXIDE PRIMER
DURABILITY	1.5 - 2 Years	1.5 - 2 Years	2 Years	NA	NA
FINISH	Matt Finish	Matt Finish	Matt	Matt Finish	Matt Finish
COVERAGE	50 sq.ft. / 2 coats	50 sq.ft. / 2 coats	50 sq.ft. / 2 coats	70 - 90 sq.ft. / 2 coats	50 - 60 sq.ft. / 2 coats
UNIQUE PROPERTIES	Quick drying, single pack, ready to use	Economy epoxy primer with good anti-corrosive properties	NA	NA	NA

*Under ideal test conditions with proper surface preparation

LUXOL QD 1K EPOXY PRIMER

It is a one pack, ready-to-use, quick drying epoxy primer, with excellent anti-corrosive properties.

- Excellent Adhesion
- Quick Drying
- Superior anti-corrosive properties

BP ANTI-CORROSIVE 1K EPOXY PRIMER

BP Anti-Corrosive 1k Epoxy Primer is a Ready to use economy 1K Epoxy primer with good anti-corrosive properties.

- Good Adhesion
- Single pack
- Anti-corrosive properties

BP ZINC YELLOW PRIMER

It is an oil modified alkyd-based BP Zinc Yellow Primer suitably pigmented with micro fine pigments and extenders. It is ideal for ferrous metal.

- Anti-corrosive
- Better Adhesion
- More strength than regular metal primer

BUTTERFLY AC METAL PRIMER RED OXIDE

Butterfly AC Metal Primer Red Oxide is a good quality primer which provides hard & tough film for mild steel, iron surfaces.

- Excellent Coverage
- Excellent Adhesion
- Excellent Opacity

RED OXIDE PRIMER

An economy quality metal primer, suitable for mild steel surfaces.

- Better coverage
- Better Adhesion
- Better Opacity

	RED OXIDE PRIMER LITE	SILK LUXURY BASECOAT	BP CEMENT PRIMER W/T	BP WHITE PRIMER W/T
DURABILITY	NA	NA	2 Years	2 Years
FINISH	Matt Finish	Excellent Smooth Finish	Matt Finish	Matt Finish
COVERAGE	45 - 55 sq.ft. / 2 coats	100 - 120 sq.ft. / 2 coats	80 - 100 sq.ft. / 2 coats	110 - 130 sq.ft. / 2 coats
UNIQUE PROPERTIES	NA	Excellent whiteness and smoothness, resistance to alkali and primary efflorescence	Superior Whiteness, alkali resistance	NA

*Under ideal test conditions with proper surface preparation

RED OXIDE PRIMER LITE

A sub-economy quality budget-friendly metal primer, suitable for mild steel surfaces.

- Good Coverage
- Good Adhesion
- Good Opacity

SILK LUXURY BASECOAT

Silk Luxury Basecoat is a premium quality water-base acrylic primer which enhances top coat performance and is suitable for interior masonry surfaces.

- Excellent Opacity
- Improves finish coat performance
- Reduces Porosity of the surface

BP CEMENT PRIMER W/T

BP Cement Primer is an interior acrylic primer which provides high whiteness and high chalk resistance.

- Anti Chalk Resistance
- Excellent Whiteness
- Better Opacity

BP WHITE PRIMER W/T

It is a specially formulated interior primer suitable for water based wall finishes which provides good brushability, better whiteness, excellent coverage and good sealing properties for top coat emulsions.

	DAMPSTOP ELASTO	SEAL-O-PRIME	WEATHERCOAT EXTERIOR PRIMER	WALMASTA EXTERIOR & INTERIOR PRIMER
APPEARANCE	White Viscous liquid	White liquid	White viscous liquid	NA
DURABILITY	NA	NA	3 Years	2 Years
WATERPROOFING	Barrier coat	with penetrative polymer	NA	NA
FINISH	Fill minor hairline cracks	Fill minor hairline cracks	Matt Finish	Matt Finish
COVERAGE	30 - 55 sq.ft. / lt / 2 coats	110 - 120 sq.ft. / lt / coat	50 - 60 sq.ft. / 2 coats	40 - 50 sq.ft. / 2 coats
UNIQUE PROPERTIES	PU modified binder for extended durability on Exterior	Increase top coat coverage by 15 - 20%	NA	Easy brushability, High opacity, Excellent whiteness

*Under ideal test conditions with proper surface preparation

DAMPSTOP ELASTO

Home Shield DampStop Elasto is a fibre-reinforced liquid applied elastomeric waterproofing membrane, impregnated with synthetic fibre. The product is specially formulated with PU Modified Binder and fibres for extended durability in exterior application.

- Prevents cracking upto 1.5 to 2 mm
- Outstanding whiteness reflects heat, provides cooling effect on the construction
- Used for recoating repairing and maintenance

SEAL-O-PRIME

Home Shield Seal-O-Prime is a specially formulated acrylic primer consisting of penetrative polymer that binds with the surface giving better resistance to water seepage. Its triple booster formulation fights against dampness, efflorescence and alkalinity, at the same time acting as a superior undercoat for direct topcoat application.

- Increase coverage of top coat by 15 - 20%
- Resists dampness efflorescence alkali
- 1:1 dilution with water

WEATHERCOAT EXTERIOR PRIMER

Weathercoat Exterior Primer is a superior primer with excellent Anti-alkali and efflorescence resistance properties, suitable for masonry surfaces.

- Anti-Alkali
- Excellent Whiteness
- Superior Coverage

WALMASTA EXTERIOR & INTERIOR PRIMER

Walmasta Exterior & Interior primer is a 2-in-1 acrylic primer with good adhesion and whiteness.

- Value for money 2-in-1 primer
- Excellent Whiteness
- Resistance to chalking

FLORENTINA GLITTERATTI

Florentina Glitteratti is a water-based high built pure acrylic resin texture body coat providing attractive decorative effects in line with the Florentina Luxury Collection. It is a combination of carefully selected aggregate including mica and a high quality acrylic binder, imparting an excellent single or multi-coloured glitter like effect.

- Resistance to adverse weather, does not get affected by changing weather
- Prevents growth of algae and fungus
- Water-resistant, presence of silicon makes it water-repellent
- UV resistant

FLORENTINA VINTAGE

Florentina Vintage is a high build product containing specially designed pure acrylic emulsion along with silicon for enhanced performance. The product has high resistance to mechanical damage, UV resistant and prevents damages from development of algae and fungus. Florentina Vintage helps in creating elegant finishes of trendy and natural looking designs on concrete structures.

- Resistance to adverse weather, does not get by affected changing weather
- Prevents growth of algae and fungus
- Water-resistant, presence of silicon makes it water-repellent
- UV resistant

FLORENTINA SANDSTONE

Florentina Sandstone is a water-based high build pure acrylic resin texture body coat incorporating natural granite chip with pearl effect. The silicon additives are enhanced for water repellence and high performance exterior wall finish.

- Resistance to adverse weather, does not get affected by changing weather
- Prevents growth of algae and fungus
- Water-resistant, presence of silicon makes it water-repellent
- UV resistant

SOLITAIRE STONE & GRANITE

It is a synthetic natural stone like spray applied finish based on pure acrylic emulsion reinforced with natural coloured aggregates and quartz. Product offers great resemblance.

- Natural stone finishes
- Silicon enhanced for water-repellent and highly resistant to mechanical damage
- Available in Granite and Stone variants

RUFF 'N' TUFF-PEARL

Ruff 'N' Tuff-Pearl is a copolymer emulsion based spray applied texture for smooth exterior and interior surfaces. By adjusting the nozzle sizes and pressure of the spray gun, it can be applied in bold, medium and small sizes to give bubble and spattered finish.

- Used for decoration, restoration and protection of interiors and exteriors
- All weatherproof and excellent durability

RUFF 'N' TUFF-SCRATCH

RUFF 'N' TUFF-Scratch is a popular and preferred trowel applied synthetic grooved finish texture. The product is formulated with modified acrylic emulsion and reinforced with quartz aggregates to withstand humidity, rain and variable climates. Used for decoration and long term protection. It is highly recommended for freshly plastered surfaces and also ideal for reviving old weather beaten surfaces.

- Used for decoration, restoration and protection of interiors and exteriors
- All weatherproof and excellent durability

RUFF 'N' TUFF-DECORA DHOLPUR

Ruff 'N' Tuff-Decora Dholpur Stone is a trowel applied textured finish providing natural, heritage, traditional stone like system providing very unique and attractive textured pattern. It is based on special synthetic copolymer emulsion reinforced with silica aggregates having excellent bonding properties and is ideal to hide and cover surface imperfections and roughness. It produces exceptional stone like pattern and offer long lasting protection to the overall structure of the building, helping to extend the maintenance cycle.

- Used for decoration, restoration and protection of interiors and exteriors
- All weatherproof and excellent durability

RUFF 'N' TUFF-ROLLER CAST

Ruff 'N' Tuff-Rollercast is a copolymer acrylic emulsion based textured coating reinforced with quartz and marble powder offering very unique and attractive orange peel like textured associated with standard plastered, smooth concrete surfaces and provides richness to the finish. Orange peel like texture would reasonably help to hide the surface defects generally and overall the building structure.

- Used for decoration, restoration and protection of interiors and exteriors
- All weatherproof and excellent durability

RUFF 'N' TUFF-PLAINO SUPERCAST

Ruff 'N' Tuff Decora Plaino Supercast is a trowel applied design finish reinforced by quartz and aggregates. It is designed for fine surfaces and such specially formulated tough and water-resistant exterior textured coating offers durable finish.

- Used for decoration, restoration and protection of interiors and exteriors
- All weatherproof and excellent durability

SILK GLAMART METALLICA

Besides walls, the Metallica range of luxurious designer finishes which is non-blackening is perfect for surfaces such as metal and wood. With its two base colours, gold and silver, a myriad metallic shades can be created.

- Multi-Surface Paint
- Easy Application
- High Glittering Effect
- GreenPro Certified

SILK GLAMART METALLICA FOR DESIGNS

The product has been developed to provide slow-drying characteristics so that the designs made out of it get ample open time for creation. Going a step further from conventional acrylic water-based paints, Design Metallica gives the wall a designer finish with glossy metallic effect added to it. It is a glossy, metallic finished, special effect paint that creates a variety of effects on interior walls.

- Unique Patterns
- Easy Application
- High Glittering Effect
- GreenPro Certified

SILK GLAMART STUCCO

Silk GlamArt Stucco is a premium super quality designer finish paint comprises of a high percentage of emulsions and special additives to provide stucco finish on the wall with excellent washability.

- Unique Patterns
- Easy Application
- GreenPro Certified

SILK GLAMART STONES & TONES

Silk GlamArt Stones & Tones is an emulsion based coating reinforced with quartz and marble powder offering a very unique and attractive spike like textured finish.

- Unique Patterns
- Easy Application
- Excellent Durability

SILK GLAMART VINTAGE

Silk GlamArt Vintage finish is a ready-to-use special effects material that can be used to create a variety of textured effects on interior walls. Different types of designs such as Denim, Fabrika, Sprinkle, Artistic etc. can be created using various application techniques.

- Unique Patterns
- Easy Application
- GreenPro Certified

SILK GLAMART NON-METALLICA

Silk GlamArt Non-metallic is a 100% acrylic emulsion paint for texture application. The product has been developed to provide slow-drying characteristics so that the designs made out of it get sufficient open time for creation.

- Unique Patterns
- Easy Application
- Green Pro Certified

	WATERPROOF PUTTY	BISON WALL PUTTY	BISON LEVELING PUTTY
APPEARANCE	Milky white free flow powder	White	NA
PACKAGING	20 Kg / 40 Kg Bags	1/5 / 20 / 30 / 40 / 50 KG	20 / 50 KG
WATERPROOFING	Exhibits Lotus Bead effects	NA	NA
FLEXIBILITY	Fill minor hairline cracks and pinholes	Smooth White Finish	Matt White Finish
COVERAGE	15 sq.ft. / kg / 2 coats	9 - 10 sq.ft. / kg	4 - 5 sq.ft. / kg
UNIQUE PROPERTY	Best in class waterproofing	Excellent Adhesion & Tensile Strength	Scratch Resistant
	NA	High Abrasion Resistance	UV Resistant

*Under ideal test conditions with proper surface preparation

WATERPROOF PUTTY

Home Shield Waterproof Putty is white cement-based premium putty with unique properties. It is a ready-to-use powder putty that can be applied both internally and externally on concrete / mortar substrates to get smooth aesthetic finish and extended life for topcoat paints.

- Cured surface provides excellent waterproofing showing lotus bead effect
- Cured surface shows remarkably distinct anti-efflorescence effect in comparison to traditional powder putties
- Seamless finish with capability to fill minor hairline crack and pin holes

BISON WALL PUTTY

Bison Wall Putty is a powder based, unique mixture of superfine white cement blended with flexible powered polymer, cellulose and other additives.

- Cost Effective
- Smooth Finish
- Easy to Apply

BISON LEVELING PUTTY

Bison Levelling Putty is specially formulated to be used as a base coat. It is meant for smoothening the undulated substrate prior to the use Bison Wall Putty or any painting system.

- Excellent Workability
- Excellent Bonding
- Water-resistant

	HAPPY WALLS ACRYLIC PUTTY	LUXOL KNIFING PUTTY	DUROCEM EXTRA	DUROCEM NEO
APPEARANCE	Milky White	NA	Matt Finish	Matt Finish
PACKAGING	1 / 5 / 10 / 20 / 30 kg	0.5 / 1 / 2 / 5 / 20 kg	25KG	25 KG
WATERPROOFING	NA	No	Yes	NA
FLEXIBILITY	Rich Smooth & Matt Finish	No	No	No
COVERAGE	10 - 15 sq.ft. / kg	6 sq.ft. / kg	50 - 55 sq.ft. / kg / coat	40 - 45 sq. ft / kg
UNIQUE PROPERTY	Easy to Apply	Can be used on metal and wooden surface for filling of dents and surface imperfections	Superior Quality Cement Paint & Value For Money	High Workability & Strong Adhesion
	Extra Smooth Finish for Topcoat			Saves Time & Money

*Under ideal test conditions with proper surface preparation

HAPPY WALLS ACRYLIC PUTTY

Happy Walls Acrylic Putty is a ready to use paste putty which provides rich, smooth finish when applied on masonry walls/wooden surface to fill substrate imperfections. It is best suited for repainting procedure.

- Easy Applicability
- Excellent Filling
- Butter Like Consistency

LUXOL KNIFING PUTTY

Luxol Knifing Putty can be used on metal and wooden surface for filling of dents and surface imperfections. Luxol Knifing Putty formulated with specially modified alkyd-based resin as a one pack, lead, chrome free system. It is easy to apply and sand. Primer and / or enamel to be used on top of it.

DUROCEM EXTRA

Durocem Extra is manufactured mainly with White Cement, Pigments, Extenders, and few Additives. It is a unique product with combination of beauty, durability, affordability.

- Waterproof Cement Coating
- Value For Money
- Both Interior and Exterior Usage

DUROCEM NEO

Durocem NEO is a polymer modified premium quality cement paint which gives superior finish and higher coverage than traditional lime based cement paint.

- No Watercuring Required
- Polymer Based Cement Paint
- Excellent Hiding

iPAINT ENAMEL SPRAY PAINT

Berger iPaint Enamel Spray Paint comes in a ready-to-use aerosol can which can easily be applied on wood and metal surfaces to get a smooth and glossy finish. This coating is highly durable and resistant to heat, sunlight, water and cold.

- High Gloss and Smooth Finish
- Convenient Packaging
- Available in Various Shades

iPAINT SELF PAINTING KIT

iPaint Self Painting Kit is a user-friendly kit with the right set of tools which are required to paint your walls by yourself. This kit is suitable for painting any water-based emulsion on your interior walls.

- User Friendly
- High Quality Tools
- Easy and Illustrative Direction of Use Booklet

iPAINT WALL STENCIL KIT

iPaint Wall Stencil Kit comes in different stencil designs with very vibrant colour options to create different patterns on the walls without any prior experience. It gives smooth finish and a beautiful experience to the walls.

- Various Design and Colour Options
- Very Handy Tools
- Smooth Finish

iPAINT GLOW IN THE DARK KIT

iPaint Glow in the Dark Kit comes in different theme options to give a beautiful look to the ceiling and walls of your room at night. This highly durable glow in the dark paint is easy to apply and stays on the wall or ceiling without falling off until it is removed.

- Good Range of Designs with Wonderful Themes
- Easy to Use Self Adhesive Stencils
- Highly Durable Finish

iPAINT ENAMEL PAINT KIT

iPaint Enamel Paint Kit is useful to give a shiny new look to your metal surfaces and wooden furniture. It comes with your favourite shade of 200 ml Enamel Paint along with a 2-inch brush and a sand paper.

- Good Range of Colour Options
- Mirror Like Finish
- Durability

iPAINT WALL STICKERS

Berger iPaint Wall Stickers are very easy to apply and have strong adhesive which gives a durable finish to the wall stickers. They are easy to apply, eco-friendly and available in various design options spread across various themes and sizes.

- Eco-friendly
- Easy to Apply
- Strong Adhesive

	TUFF-FLOOR NM	WEATHERCOAT FLOOR PROTECTOR
DURABILITY	NA	5 years
COVERAGE / LT / 2 COATS	5.0 Kg / m2 (Thickness : Approx 2.5 to 3.0 mm)	90 - 100 sq.ft.
ANTI-FUNGAL	NA	Very High
DIRT REPELLENCE	Excellent	NA
WATER REPELLENCE	NA	NA
FINISH	NA	High Sheen
UNIQUE PROPERTIES	Good wear resistant rating	High abrasion resistance
	Impact resistance & Dust proof	High Sheen Finish

*Under ideal test conditions with proper surface preparation

TUFF-FLOOR NM

Home Shield Tuff-Floor NM is a one-part, pre-blended, cement grey coloured mineral dry shake hardener for concrete comprising of cement, specially selected natural mineral aggregates, admixtures.

- Non-metallic mineral dry shake floor hardener
- Cost effective surface hardener
- Increased resistance to oil and grease

WEATHERCOAT FLOOR PROTECTOR

Weathercoat Floor Protector is a pure acrylic paint suitable for concrete floors. The paint provides excellent substrate adhesion and best-in-class abrasion resistance. It gives a rich, durable finish to the floors and is available in wide range of colours.

- High Sheen Finish
- High Adhesion
- High Abrasion Resistant
- Available in Direct shades

LASER DISTANCE METER

- Handheld compact robust design with amazing features of IP54 waterproof, drop resistance offers your long life span
- Equipped with integrated electronic tilt sensor helps measure horizontal alignment with real time measuring angle
- Offers comprehensive measuring functions of area, volume, auto height, auto level etc. which can meet the measurement needs of most people and provides high quality measuring experience for you to try

FURNITURE COVER

- Protects valuable furniture from dust and painting spills
- Quantity per packet - (L) 5 & (S) 5
- Size - (L) 54" X 156" & (S) 8" X 10"

FLOOR COVER

Ensures floors are kept clean from dirt, painting droplets and dust settling during painting.

- Quantity per packet- 3 pcs • Size - 48" X 120"

MULTIPURPOSE SEAL TAPE

HS Multipurpose Seal Tape is multipurpose, all weather, easy to apply, self-adhesive, pressure-sensitive, UV resistant bituminous tape protected by aluminium-film and reinforced with polyester film. Multipurpose Seal Tape bonds to a wide range of building materials to form an instant, permanent, and water-tight seal.

- Ready to use, cold applied, simple and quick application. Saves time and cost. Compatible with most building material
- No special tool is required. Only a sharp knife / scissors and a roller / cloth pad are enough
- Requires no torching / chemical bonding agent as it is cold applied
- Withstands climatic changes

GP THINNER

Berger Premium GP Thinner is a specially designed thinner with 100% Pure MTO to improve brushability and flowability of oil and alkyd-based products. It improves paint consistency and allows paint to acquire optimum film characteristics. It can be used as a cleaner for oil, dirt and grease on the metal surfaces before painting.

- 100% pure MTO (Transparent in colour)
- No additives
- No drying problem
- No hazardous carcinogenic substances
- Not harmful to skin

BRUSHES

- Superior Paint Pickup and Release
- For Both Interior and Exterior
- Excellent Feel of Bristles
- Easy to Clean
- Value for Money
- Size available: 2" / 3" / 4" / 5"

ROLLERS

- Type of rollers – Felt/Foam
- Sizes available – 4" / 6" / 9"
- For Both Interior and Exterior
- Easy to Clean
- Value For Money

CLOTH ROLL

Berger's Cloth backed Rolls are manufactured using Aluminium Oxide grains with specially formulated bond systems and compatible backing for optimum performance in wall, wood, and metal application.

- Premium Aluminium Oxide Grain
- Tougher Backing-provides Longer Life
- Tough Bond for faster cutting
- Better Finish
- Higher Cut Rate
- Width Available – 3" / 4" / 6"
- Grit Range – 60 / 80 / 100 / 120

WET & DRY SHEETS

- Less Clogging
- Faster Cut Rate
- Superior Finish
- Better Durability
- Superior Wet Strength
- Heavy Duty Paper Backing
- Usage Area: Wall Sanding & Wood Sanding
- Sheet size: 22 cm X 28 cm
- Grit sizes: 80 - 1000
- 1 Packet = 50 Sheets

SUKHA PAPER

- Used for dry Sanding
- Tough bond for faster cutting
- Good finish
- Minimal clogging
- Grit Sizes: 60 – 400

MASKING TAPE

Premium quality specially designed for painted walls, woods, laminates & glass.

- Length Available: 15M / 20M / 25M / 30M / 40M
- Width Available: 12mm / 18mm / 24mm / 36mm / 48mm
- Easy to remove and tear
- No Residual
- Temperature Resistance up to 60 degrees
- 0.5 Inch - 12 Rolls per tube
- 1 Inch - 6 Rolls per tube
- 2 Inch - 3 Rolls per tube
- High Adhesion

PAINTING TRAY

- Ideal for both water & oil based paints
- Superior Quality
- Reduces Paint Wastage
- Easy Removal of Excess Paint

MASKING FILM

Berger's Masking Film is a high density, non-porous film used to protect surfaces against any paint job or woodwork activity. It is an effortless solution that leaves no residue and provides reliable protection every time.

- For Interior and Exterior
- High Density & Durability
- Easy to Unfold
- Minimum Wastage
- No Sticky Residue
- Saves Time & Effort

HAND HELD SANDER

- Pinion gear driven sander, Avoids jerks to motor, Ensures longer working life
- 9" dia sander disc helps sand more space in shorter time
- Separate impeller system ensures proper dust suction
- 1010 Watt heavy duty motor ensures faster sanding

WOOD SANDER NXT

- Compact Model, Easy to carry
- Less strain, Suitable for smoothing wooden surface
- Easy to remove dust-collector
- User friendly and adjustable speed ensure proper finish
- 260 Watt motor and proper cleaning after use ensure consistent performance and long life

AIRLESS SPRAYER MAX

- Diaphragm Airless Sprayer in a compact and easy to assemble design, ready in minutes
- Hard wheels and folding handles for portability. Easy to move
- 1150 Watt powerful motor and pressure adjustable system for smooth performance
- Best price and performance in its class

DRY WALL SANDER

- Saves time and gives dust-free cleaner results due to in-built vacuum suction system
- Long handle helps to reach ceilings and high areas of the wall
- Short handle sander helps to sand wall surfaces

DUSTLESS HOOK AND LOOP SANDPAPER

Berger wall sanding paper 9" available in grit sizes 80, 100, 120, 150, 180, 220, 320, 400, 600 to be used with Berger Hand held and Long handle sander

WOOD SANDER

- Designed to reach every corner of wood surfaces during sanding process
- In- built vacuum cleaner
- It is available in 3 different heads Square, Pentagon and Round

DUSTLESS HOOK AND LOOP SANDPAPER FOR WOOD SANDER

- Wood sandpaper to be used with berger wood sander
- It is available in 3 shapes square, pentagon and round in sizes 5 inch, 4.5 inch with grit sizes 60, 80, 120, 240, 320, 400, 600, 800, 1200

AIRLESS SPRAYER NEO

- Small and trendy look but a very powerful machine
- Easy-to-fit accessories gets the machine ready in minutes. Very easy to use and carry
- 1010 Watt machine able to create pressure up to 21 Mpa
- Best price and performance in its class

MULTI MIXER

- Used for mixing putty & textures to perfect consistency
- Twin-gear technology helps faster mixing of different volumes by adjusting gear and speed
- Gear-shifting technology helps extend life of motor
- 1160 Watt motor, Mixing paddle diameter and twin gear ensure proper mixing in a faster way

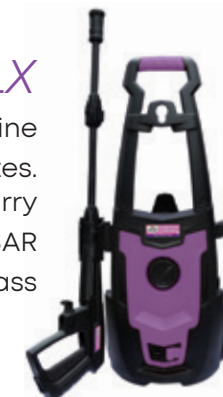

JET WASHER

- 2200 Watt powerful motor cased in a strong aluminium body for consistent performance
- Compact and powerful machine, Stable position close to ground, able to handle 110 BAR pressure
- In-built Pressure Gauge to monitor water pressure

JET WASHER NXT LX

- Small and trendy look but a very powerful machine
- Easy-to-fit accessories gets the machine ready in minutes. Very easy to use and carry
- 1400 Watt machine able to create pressure up to 110 BAR
- Best price and performance in its class

MOISTURE METER DM200C

- Specially calibrated to detect and measure moisture content in concrete and plastered surfaces
- Accurately detects degree of trapped moisture in concrete floor, walls and ceilings caused by cracks, damaged pipes, rain water or underground seepage
- The scientific and accurate diagnosis helps evaluate the damage so that you can take appropriate steps to waterproof your home

T-SHIRTS

Exclusively designed Berger Express Painting branded T shirts for painters

PAINT SCRAPER

Strips clean old paint from plastered painted surfaces

SALVALINE ALM PAINT

Berger Salvaline Aluminium Paint is a superior grade aluminium paint. It is given separately as medium and aluminium paste in a dual container. It gives a silvery shiny finish when applied on metal and wooden surfaces, if properly prepared. Salvaline Aluminium medium is manufactured with a special grade resin having zero acidic property which is why the aluminium paste has a shiny finish. It is widely used in places / surfaces like chimney, outside gas holders, petrol / oil storage tanks, steel structures, grills, gates, shutters, corrugated roofs, and many places.

WOODKEEPER WOOD STAINER

Woodkeeper Woodstainer offers ultratransparent high-colour strength shades which are meant to highlight & enhance intricate grain patterns of your precious solid wood & veneered furniture, thereby giving an exquisite look to even ordinary wood types.

- Colour strength is high as a result of which it looks beautiful once applied
- Available in Leakproof Aluminium Bottles with inner cap & outer seal leading to zero product waste. Wood Stains have quite volatile solvents which evaporates once exposed

ILLUSION SEALER

Berger Sealer is formulated with special grade emulsion, which forms a transparent film over the substrate. It is a water-based coating for exterior surfaces which will not allow water to penetrate the surface by sealing porosity of the substrate.

- Super Quality
- Alkali & Salt Resistant
- Increase Top Coat Coverage
- Normal Damp Resistant

RUSTOFF

Home Shield Rust off is Chloride and Sulphate Free Liquid Rust Remover.

- Simple, Economical, Cost Effective
- Easy to Apply
- Effectively Removes Rust from all Kinds of Steel Surfaces

POLYUREA

SPRAY APPLIED HEAVY DUTY POLYUREA

Home Shield Polyurea MP500 is a spray-applied, 100% solids, flexible, two-component, rapid curing pure Polyurea system, designed as a durable, seamless waterproofing and protective coating with long life span.

COATING

2K BRUSHABLE POLYUREA

HS Shaliprotek PUR 40 is a two component, brushable modified polyurea coatings for roof and metal surfaces with very high durability and excellent waterproofing / protective coating characteristics.

PROPERTIES OF SPRAY APPLIED POLYUREA

PROCESSING PROPERTIES	DATA
Mixing ratio of Comp. A to Comp. B	1 : 1 by volume
Material consumption	Approx. 1 kg / m ² for 1 mm thickness
Recommended thickness	Minimum: 1.0 mm
Gel time at 20°C [sec.]	10 – 15 (dependent on ambient and substrate temperature)
Tack Free Time at 20°C [sec.]	15 – 30 (dependent on ambient and substrate temperature)
Over coat cycle [h]	0 – 12 Hours (without prep and priming)
Curing / loading after [h]	Foot traffic: 1, Mechanical: 2-4 Chemical: 12-24
Pay attention to the dew point limit	Min. 3K > DP (dew point)
Chemical Base	Comp. A: MDI-Prepolymer , Comp. B: Polyolamin Mixture
Viscosity [mPa*s] @ 25°C	Comp. A: 300 – 900, Comp B: 700 – 1.200
Density [g / cm ³] @ 20°C	Comp. A: 1.09 – 1.13, Comp. B: 0.99 – 1.03
Density [g / cm ³]	0.99 ± 0.02
Tensile strength [MPa]	≥ 13
Elongation at break [%]	450%
Modul [Mpa]	100% elongation ≥ 7, 300% elongation: ≥ 10
Hardness [Shore A]	89±5
Tear growth resistance [N / mm]	≥ 17
Peel off strength [N / mm]	Concrete: ≥ 3, Steel: ≥ 6
Pull off strength [N / mm ²]	Concrete: ≥ 1.5, Steel: ≥ 4
Heat Conductivity [W / m*K]	0.245

Typical Usage

- Large scale Waterproofing for Commercial, Industrial & manufacturing facilities
- Waterproofing of high impact areas – Plant rooms, trafficable roof decks
- Waterproofing for areas exposed to high wind abrasion
- Waterproofing of water features, pools and ponds
- Under concrete screed Waterproofing of large scale podium decks
- Waterproofing of Bridge, street and tunnel construction
- Waterproofing and containment applications where high humidity and high levels of residual moisture are not factors to be considered during application

WATERPROOFING FOR EVERY CORNER

BASEMENT

WATERPROOFING SYSTEM OPTIONS

1. PVC / HDPE / SBS Membrane
2. Crystalline Coating and Crystalline Admixture
3. Injection Grouting
4. Cementitious Coating System

ROOF/TERRACE

WATERPROOFING SYSTEM OPTIONS

1. Elastomeric Coating System with
Option 1: PU RoofKoat
Option 2: Roof Guard
Option 3: Damp Shield Elasto
2. PVC / APP Membrane
3. Cementitious Coating System
4. Solvent PU System
5. Polyurea Coating

ROOF GARDEN

WATERPROOFING SYSTEM OPTIONS

1. PVC / APP Membrane
2. Solvent PU System
3. Polyurea Coating

OVERHEAD TANK

WATERPROOFING SYSTEM

1. Cementitious Waterproofing with Tank Shield PW

SWIMMING POOL

WATERPROOFING SYSTEM OPTIONS

1. Cementitious Waterproofing System with
Option 1: Tank Shield PW
Option 2: Latex Shield 2K
2. Solvent PU System
3. Polyurea Coating
4. Complete Tile Fixing Solution

CONCRETE

WATERPROOFING SYSTEM OPTIONS

1. Integral Waterproofing with
(i) Power Plasticizer
(ii) Advanced Latex Plus
2. Crystalline Coating & Crystalline Admixture

TILE FIXING

COMPLETE SOLUTION

1. Adhesive for Floor Tiles : Tile Adhesive
2. Adhesive for Wall Tiles : Tile Adhesive Plus
3. Adhesive for Large Tiles : Tile Bond Anti Slip
4. Flexible Adhesive : Tile Bond Hi-Flex
5. Tile Grout (Epoxy / Cementitious)
6. Tile Cleaner

BATHROOM/ KITCHEN/ BALCONY

WATERPROOFING SYSTEM OPTIONS

1. Cementitious Waterproofing System with
Option 1: Wall Shield 2K
Option 2: Latex Shield 2K
2. Solvent PU System

INTERIOR WALL

WATERPROOFING PRODUCTS

1. DampStop Advanced
2. Wall Shield 2K
3. Home Shield Waterproof Putty
4. Seal-O-Prime / Seal-O-Prime Advanced

EXTERIOR WALL

WATERPROOFING PRODUCTS

1. Home Shield Waterproof Putty
2. Seal-O-Prime / Seal-O-Prime Advanced
